Our Mission
Since 1956 ASPE serves the construction & engineering industries by providing education, training, fellowship and opportunities for professional estimating development.
President’s Message

An interesting situation is occurring in regards to construction costs. As the general construction market continues to take a downturn in project starts, the construction cost index (CCI) and the building cost index (BCI) are trending upward. According to ENR (April 6, 2009) on a national average, the BCI has risen to an annual rate of 4.1% while the CCI has risen to 5.1%. One would think that with the lower demand of construction starts that the need for building materials would soften, resulting in lower prices. The main culprits appear to be spikes in labor and commodity costs. Let’s hope that in the near future, construction starts will rise again. What impact if any, will this have on the building price indexes?

On May 13th, we are having a technical presentation on mechanical estimating. This presentation will discuss and highlight important items for understanding and preparing a mechanical estimate. More information about the dinner meeting is provided below.

A scholarship will be awarded on May 13th to a construction student. Board member Peter Garan chaired the scholarship committee, did initial screenings, and a final selection was approved by the Board. A $500 scholarship will be presented.

All are invited to attend our meetings. Members and non-members alike are always welcome. To RSVP, simply sign-up from our web link.

Dinner meetings are held on the second Wednesday of each month. We meet at the Mezzanine Building at the Newport Gateway Towers, in Irvine (see below map for details). The next meeting is scheduled for Wednesday, May 13th. Social hour starts at 5:30 PM with dinner at 6:30 PM followed by our presentation and closing by 8:00 PM.

April’s LEED workshop at the Mezzanine Building restaurant was a great success. Over thirty people attended this event. A special thanks goes out to Holly Hill, AIA, LEED AP of HMC Architects who made the workshop presentation. Hopefully, all of those that took the workshop will pass the upcoming LEED exam. Good Luck!

Our first estimating academy is scheduled for Saturday, May 30th. The all day estimating seminar will have something of interest for all estimators, including the seasoned professional and for anyone that is interested in learning solid fundamentals and practical techniques. All attendees will receive workshop materials that can be used as a future reference guide. See the attached flyer for further details and registration information.

The planning continues for our first golf tournament scheduled for Wednesday, August 5th at the Aliso Viejo Country Club, a private golf course. If you would like to volunteer in any capacity, please contact Anita Beukman. Members, non-members, and guests are welcome to participate. Book your foursome now. See our attached flyer for more information.

In May, all Chapter 3 members will be receiving a ballot for next year’s elections of new officers. Positions include President, 1st – 3rd Vice presidents and Treasurer. All board and committee members are voluntary positions with no voting required per our by-laws. Please vote for a candidate or write-in. Ballots are due by May 30th. Results will be announced in June. New terms start September 2009 thru September 2010.

~ Dan Schottlander, CPE
President, ASPE Orange County Chapter
Notes from the President

Chapter Website
ASPE reservations can be booked online. Our chapter website is www.ASPEChapter3.org. Each month our website is expanding with new links and additions. Our website is updated throughout the month. Be sure to log on and check us out. The national website is www.ASPEnational.org.

Golf Tournament
Our Chapter’s first golf tournament has been confirmed for August 5th at the Aliso Viejo Golf Club, located in Aliso Viejo, CA. Watch our flier as more information will be periodically posted by chairperson Anita Beukman.

Canon #5
Professional estimators shall conduct themselves with integrity as all times and not knowingly or willingly enter into agreements that violate the laws of the United States of America or of the states in which they practice. They shall establish guidelines for setting forth prices and receiving quotations that are fair and equitable to all parties.

Canon #6
Professional estimators shall utilize their education, years of experience and acquired skills in the preparation of each estimate or assignment with full commitment to make each estimate or assignment as detailed and accurate as their talents and abilities allow.

Canon #7
Professional estimators shall not engage in the practice of “bid peddling”, as defined by this code. This is a breach of moral and ethical standards, and a member of this society shall not enter into this practice.

Canon #8
Professional estimators and those in training to be estimators shall not enter into any agreement that may be considered acts of collusion or conspiracy (bid rigging) with the implied or express purpose of defrauding clients. Acts of this type are in direct violation of the Code of Ethics of the American Society of Professional Estimators.

Canon #9
Professional estimators and those in training to be estimators shall not participate in acts, such as the giving or receiving of gifts, that are intended to be or may be construed as being unlawful acts of bribery.
Peter Garan, CPE  
Manager of Estimating  
Analytical Planning Services, Inc.

I have been around Architects, Engineers and Contractors for all my adult life. After graduating with degree in Architecture and Building Technology in Czechoslovakia I got the opportunity working for Corps of Engineers, specializing in design and construction of modular bridge systems to allow rapid troop movement over river and lakes.

In 1968 due to the political instability and consequent invasion of Soviet Red Army into our home Country, I have immigrated with my family to the United States and obtained US Citizenship in 1974.

The first few years in our new Country were quite challenging between learning English and converting from metric to Imperial units of measurements. (The German, French and Russian languages were not much help here). My first employer was the Power Division of Bechtel Corporation where I was working on fossil and nuclear power plants for the next 10 years. After the nuclear power in US was killed in late 70’s I left Bechtel and went working for The Austin Company, where I got involved in the estimating field. Since then I have had an opportunity working for Koll Construction, Fluor Corporation and briefly as an independent Consultant in capacity as a Sr. Estimator and Sr. Project/Construction Manager on wide variety of projects, to numerous to list.

My first exposure to ASPE happened in early 1980’s when I become a member and eventually received a certification in 1986. After that I have taken a brief departure from ASPE activities, due to my out of state assignments at Nevada Test Site, Texaco & Shell Oil in San Louis, Intel Corp. in Boston and IBM in New York. Back in California (Thanks God) I have renewed my ASPE membership in 2006 and truly enjoying meeting the other fellow’s estimators and exchanging the mutual experiences and ideas. I certainly hope with the help of other members, we can generate enough interest among young generation to pursue the estimating career.

We all hear this every time the estimators can never be right; they never get any credit only the blame. There is some truth in that. However based on my personal experience, I strongly believe if we can learn from the previous mistakes and use our experience and all available resources, we can defy this misconception and be right most of the time (If management is listening) and contribute to the success of any projects.

In my free time I like spending time with my family, play tennis and golf, ride bicycle, shooting trap and listening to classical music, opera and jazz.
Mr. Ryan Bullard Director of Engineering Sales for Victaulic Corporation will be discussing the different types and uses for patented Victaulic piping connections. Their pipe connections are literally used around the world for industrial, mechanical, process and building systems.

Piping connections, types of pipe, their uses, labor advantages, cost factors & comparisons to standard piping connections such as welded, flanged joints will all be discussed. Green building LEED advantages to using Victaulic connections, sizes available, pressure ratings and safety considerations will also be presented.

We will discuss grooved applications for both Copper and Stainless Steel plumbing systems. A review of basic grooved connection types will be followed by an introduction to new technology including installation-ready couplings and push-to-connect systems. The features and benefits of plumbing systems that utilize the grooved method will be discussed in regard to jobsite safety, LEED and “Green Building,” increased productivity and reduced total installed cost when compared to traditional joining methods.

Further information can be found on their website; www.victaulic.com.
MEETING INFORMATION

Speaker: Ryan Bullard
Date: Wednesday, May 13th, 2009
Social Time: 5:30 p.m. - Program & Dinner: 6:30 p.m.

Location: 19800 MacArthur Boulevard, Irvine, CA
The Mezzanine @ Newport Gateway Towers
Restaurant is located on the lower level of the Mezzanine Towers
P: 949 724-1066
405 Freeway @ MacArthur Junction between MacArthur & Fairchild

Dinner:
Chicken Breast & Bow Tie Pasta Alfredo w/ Spinach $40
Steak w/ Grilled Vegetables $40
Vegetarian Lasagna $40

For reservations, please go to our website to book your spot at www.aspechapter3.org or, contact Shantha Suraweera at 949.476.2094, or via email at ssuraweera@ocmi.com.

FROM ASPE ORANGE COUNTY CHAPTER
By: Danielle Leyva

April’s dinner meeting was both interesting and refreshing. Mike Smith and Todd Paiva of Performance Contracting Inc. gave a presentation on how to estimate metal stud wall systems and drywall finishes.

Mike started the presentation out by introducing PCI and the different projects that they’ve worked on. PCI is a national company that specializes in hospitals, airports, military, and retail construction interiors. Todd continued the presentation going straight to the take-off. PCI uses On-Screen Take-off to fulfill their estimating needs. On-Screen is a powerful tool that lets the user take-off quantities in less time! This program also allows you to build a database of unit costs. This results in an almost complete cost estimate with just a few more adjustments by the estimator.

If you haven’t had a chance to work with this program, you should definitely look into the benefits that it offers.
Please join the Orange County Chapter’s Estimating Academy on Saturday, May 30th, 2009. Back to Basics with a Twist; Learn how to prepare all of your estimates with a solid foundation. Attendees can expect to learn practical and innovative estimating methods, current techniques and the latest industry estimating technologies. This full-day event is packed with educational information and networking opportunities.

Any Program Ideas?

In order to make our chapter work for everyone we are looking for your ideas and input. What topics would you like to see discussed? What programs would you like? If you are a General Contractor, Subcontractor, Consultant, Architect or Engineer, what topics are you interested in? Any suggestions that you have, we would be appreciated.

Quote of the Month

“Happiness is the state of consciousness which proceeds from the achievement of one’s values.”

~Ayn Rand US (Russian born) novelist 1905 – 1982
